

September 1, 2019

Dear Business Owner,

Eversource and the Town of Framingham are excited to announce that you are eligible for a no-cost energy analysis of your business.

During the analysis, small business experts can help you identify which of our industry-leading energy-efficiency solutions are best suited to save you money, lower your energy use and provide you with a competitive advantage.

Energy-saving solutions include interior and exterior LED lighting, refrigeration controls, programmable thermostats, water-saving devices, insulation and more. Our experts can work with you to determine which solution is best for you and your bottom line.

In addition of the no-cost energy analysis, you might be eligible for significant incentives toward the installation of energy-efficient equipment, as well as interest-free financing on your portion of the project costs.

This turnkey program allows you to focus on your core business while Eversource puts their energy expertise to work, saving you money and energy every day. AECOM, the vendor under contract with Eversource, will arrange for professional installation of your project by licensed and local technicians, ensuring that there is minimal disruption to your daily operations. Your new, high-efficiency products will be backed with warranties on both materials and labor.

A team from Eversource and AECOM will be in the area on Monday, September 9 through Friday, September 13 to provide the no-cost analysis. To schedule your no-cost assessment at a convenient time, call AECOM directly at (617) 371-4512.

We look forward to helping your business save money and energy.

A handwritten signature in black ink that reads "Maureen B. Kiely".
