

**Framingham Police Department
Use of Force
End of Year 2019**

Between January 1st, 2019 and December 31st, 2019, there were 78 use of force incidents. Below is a breakdown demonstrating the highest level of force used during each incident in 2019. The data shows that approximately 64.10% use of force incidents were physical encounters only. Taser warnings accounted for approximately 16.67% of the use of force incidents. A firearm pointed at a subject accounted for approximately 14.10% of the use of force incidents. Firearm pointed and bean bag deployed, OC spray, Taser (drive stun), and Taser (deployed) each accounted for approximately 1.28% of the use of force incidents. Below demonstrates a quarterly breakdown of the use of force incidents.

Of the 78 incidents where force was used, approximately 82.05% resulted in an individual being arrested. Approximately 15.38% were incidents where a Section 12 was established either by the Framingham Police Department or a third party agency. Lastly, approximately 2.56% of the incidents were incidents where force was used at some point during a summons or a motor vehicle pursuit. Below demonstrates a quarterly breakdown of incident dispositions.

Framingham Police Department
 Use of Force
 End of Year 2019

The majority (approximately 80.77%) of incidents where force was used, the subjects were male and approximately 19.23% of the subjects were female. Furthermore, more than half (approximately 65.38%) of the incidents where force was used, the suspects were White, followed by Black (approximately 21.79%), followed by Hispanic (12.82%). For a more thorough examination of the type of forced used by gender and race/ethnicity, please see the charts below.

Framingham Police Department
Use of Force
End of Year 2019

Of the 78 incidents where force was used, there were 12 occasions where officers were injured. This accounts for approximately 15.38% of the data. During the other 66 incidents, the officers were not injured. Similarly, the vast majority of suspects were not injured when force was used. Of the 78 incidents, there were 12 suspects that were injured. Again, this accounts for approximately 15.38% of the data. During the other 66 incidents, the suspects were not injured.
